

GALAXIES

(chorus)

TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)
TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)

(verse 1)

SPIRAL GALAXIES
ARE THE MOST BEAUTIFUL TYPES OF GALAXIES
IN THEIR LONG TWISTING ARMS
ARE AREAS WHERE STARS ARE FORMED
THE SPIRAL COME FROM, WELL THEY SAY
THE SPIRAL ARMS ARE CIRCLING WAVES
WHAT MAKES THE WAVES GLOW ARE THE STARS
SOME OF THE STARS FORMED THERE ARE LARGE

(chorus)

TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)
TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)

(verse 2)

ELLIPTICAL GALAXIES HAVE VERY OLD
STARS FOUND IN THEM CREATED ALONG TIME AGO
ELLIPTICAL GALAXIES DON'T FORM NEW STARS
THEY FORM AROUND STARS THAT'S ALREADY BORN
ELLIPTICAL GALAXIES HAVE VERY CLOSE STARS
MAKES THE CENTER LOOK LIKE ONE GIANT STAR
IF WE WERE INSIDE AN ELLIPTICAL GALAXY
IT WOULD BE BRIGHT BOTH DAY AND NIGHT

(chorus)

TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)
TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)

(verse 3)

IRREGULAR GALAXIES ARE THE GALAXIES
THAT ARE NOT SPIRAL OR ELLIPTICAL
IRREGULAR GALAXIES ARE THE GALAXIES
THAT ARE NOT SPIRAL OR ELLIPTICAL
THEY CAN LOOK LIKE ANYTHING AND HAVE MANY CHARACTERISTICS
BUT THEIR STILL DIFFERENT
THEY CAN LOOK LIKE ANYTHING AND HAVE MANY CHARACTERISTICS
BUT THEIR STILL DIFFERENT

(chorus)

TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)
TAKE A LOOK THROUGH MY TELESCOPE AND GO TELL THE FOLKS
THAT I (I SEE GALAXIES)
