

PERIMETER

THE PERIMETER OF A SQUARE IS

$$(\text{SIDE} \times 4)$$

OR

$$(\text{LENGTH} + \text{HEIGHT} + \text{LENGTH} + \text{HEIGHT})$$

THE PERIMETER OF A RECTANGLE IS

$$(2 \times \text{LENGTH}) + (2 \times \text{HEIGHT})$$

OR

$$(\text{LENGTH} + \text{HEIGHT} + \text{LENGTH} + \text{HEIGHT})$$

THE PERIMETER OF A PARALLELOGRAM IS

$$(2 \times \text{LENGTH}) + (2 \times \text{HEIGHT})$$

OR

$$(\text{LENGTH} + \text{HEIGHT} + \text{LENGTH} + \text{HEIGHT})$$

THE CIRCUMFERENCE OF A CIRCLE

$$\pi \times \text{THE DIAMETER}$$

THAT'S 3.14 \times THE DIAMETER

TO GET THE DIAMETER ADD RADIUS + RADIUS

THE CIRCUMFERENCE OF A CIRCLE IS $\pi \times$ THE DIAMETER
