

# ECOLOGICAL SUCCESSION

(chorus)

ECOLOGICAL SUCCESSION, ECOLOGICAL SUCCESSION

ECOLOGICAL SUCCESSION, ECOLOGICAL SUCCESSION

SUCCESSION, SUCCESSION

SUCCESSION, SUCCESSION

(chorus)

PRIMARY SUCCESSION HAPPENS IN AN AREA WHERE THERES NO LIFE

LIKE IN AN AREA COVERED BY LAVA ALL DAY AND ALL NIGHT

AND IN TIME DIFFERENT ORGANISMS BEGAN TO GROW

AND AS THOSE DIFFERENT LIFE FORMS CHANGE SUCCESSION IS A GO

SECONDARY SUCCESSION IS A LITTLE BIT DIFFERENT

IT HAPPENS IN AN AREA WHERE LIFE ONCE EXISTED

LIKE IN A FORREST THAT HAS BEEN DESTROYED BY FIRE

NOTHING LIVES THEN ALL OF A SUDDEN PLANTS START TO GROW OVER TIME

THAT IS SUCCESSION

(chorus)

ECOLOGICAL SUCCESSION, ECOLOGICAL SUCCESSION

ECOLOGICAL SUCCESSION, ECOLOGICAL SUCCESSION

SUCCESSION, SUCCESSION

SUCCESSION, SUCCESSION
