

LIVING THINGS COMPETE

(verse1)

HABITATS HAVE A CERTAIN AMOUNT OF RESOURCES
THAT'S NEEDED BY LIVING ORGANISMS
FOOD (FOOD), WATER (WATER), AND (AND), SPACE (SPACE)
THINGS THAT ALL ORGANISMS NEED
WHEN ORGANISMS REPRODUCE AND GROW IN NUMBERS
YOU GET MORE ORGANISMS AND LESS RESOURCES
SO NATURALLY THEY HAVE TO COMPETE
WITH EACH OTHER FOR WATER AND SOMETHING TO EAT

(chorus)

IT'S A FIERCE COMPETITION- PLANTS AGAINST PLANTS
IT'S A FIERCE COMPETITION-ANIMALS AGAINST ANIMALS
IT'S A FIERCE COMPETITION- IN THE ECOSYSTEM

(verse2)

NOW PLANTS COMPETE WITH EACH OTHER
FOR LIGHT, NUTRIENTS AND WATER
ANIMALS COMPETE WITH EACH OTHER
FOR WATER, MATES, FOOD AND SPACE
NOW PLANTS COMPETE WITH EACH OTHER
FOR LIGHT, NUTRIENTS AND WATER
ANIMALS COMPETE WITH EACH OTHER
FOR WATER, MATES, FOOD AND SPACE

(chorus)

IT'S A FIERCE COMPETITION- PLANTS AGAINST PLANTS
IT'S A FIERCE COMPETITION-ANIMALS AGAINST ANIMALS
IT'S A FIERCE COMPETITION- IN THE ECOSYSTEM
